ACC Graduate Follow-up Survey Results
2001-02 Graduates: Workforce Outcomes

To assist Texas community colleges in determining whether their workforce programs are meeting the state standard that 90% of program graduates are employed, or continuing their education, or both, the Texas Higher Education Coordinating Board (THECB) uses state employment records and various THECB data to locate students following graduation. Colleges are also encouraged to conduct their own follow-up activities. Therefore, each year, ACC surveys its graduates of the previous academic year to provide data that supplement the THECB’s tracking data.

The ACC 2001-2002 Graduate Survey was distributed to 1,203 students who graduated during the 2001-2002 academic year. A total of 400 (33.2%) questionnaires were returned. Not all respondents answered every question in the survey.

Graduates were asked to respond to questions about:

- employment status after graduation
- whether their degree or certificate was required for their job
- any volunteer work involving ACC training
- their opinion of how well ACC prepared them for employment or further education

The chart below illustrates that of the 400 graduates responding, 295 (73.8%) are employed, or were at one time after graduating. Of those, 225 graduates (76.3% of all respondents) were employed in a job that was related to their ACC training. Additionally, 6 respondents (1.5%) volunteered in an area related to their ACC training even though they did not use their training in their job.

Nearly half of respondents (47.0%) rated their ACC preparation for employment or further education “excellent” (38.0%) or “satisfactory” (9.0%), while about forty-two percent rated their preparation “Good only in some areas.”

Follow-Up Survey Results: 2001-2002 Graduates

Cohort of 2001-02 Graduates
N = 1,203

Responded to survey
n = 400 (33.2% of all graduates)

Non-respondents
n = 803 (66.7% of all graduates)

Employed/Employed at one time
n = 295 (73.8% of respondents)

Employment not related to college training
n = 51 (17.3% of respondents)

Employment related to college training
n = 225 (76.3% of respondents)

Not employed
n = 86 (21.5% of respondents)

Not employed but volunteered related to college training
n = 10 (2.5% of respondents)

Employed not related to college training
n = 6 (1.5% of respondents)

Total Either Employed or Volunteered in field related to college training
n = 241 (60.3% of respondents)
